

The FRPT Webinars

We are excited to announce a series of exclusive, free webinars in the lead up to our main conference in Rome!

As a taster of what you can expect at the upcoming **FRPT 2024 Conference**, we would like to invite you to join us for **three complimentary webinars** which will take place in **March, September and November** prior to the main event.

Each webinar features two well-known experts in the flash and radiotherapy field who will update you on the latest science and novel approaches. There will also be room for discussion and a live Q&A!

The webinar recordings will be available for viewing on-demand for 1 month after the live events. Additionally, registered webinar participants will receive access to related sessions from the FRPT 2023 Conference, for viewing during and after the live webinar days.

***Please note the places for the free webinars are limited and pre-registration is required.**

The FRPT webinars are with educational purposes and to demonstrate the latest developments, presented by experts in the field. No commercial promotion will be done. Any equipment shown is incidental and is not used to promote companies.
